Why Utah?

Highlights

Utah is a hub to all major western cities and states, as well as a central point for distribution between the Canada and Mexico borders. Two major interstates (I-80 and I-15) and all three major rail lines leaving Seattle, San Francisco, and Los Angeles ports meet in Salt Lake City.

Utah ranks well across business costs compared to regional competitor states. Utah has a favorable tax climate-ranked 8th best in the nation-and has low utility and real estate costs. Utah also has a business friendly government and has eliminated or modified nearly 400 business regulations since 2011 to ease the burdens placed on businesses.

Utah's Manufacturing and Distribution industry has experienced employment growth of over 15% over the past five years. Within the industry, Warehousing and Storage increased by 44%.

Yes, Utah

Studies found that Utah is the most affordable state with one of the lowest costs of living, boasting the lowest percentage of income spent (63.3%) and the highest disposable income per capita (\$32,732). Contributing to Utah's affordability is its median income of \$89,168, coupled with the nation's lowest health care spending at \$6,213.

Consumer Affairs ranks Utah #1 place to move to 2024 "analysis shows Utah should get top consideration as a new home. Its affordability score is the highest of any state and can be attributed to its low property taxes — residents had a 0.57% average effective rate in 2021, according to the Tax Foundation — and relatively high median household income (\$79,449 median in 2021, according to census data)."
