Data Center Facts – Lower Level

2600 W Big Beaver Road Troy, Michigan

DESCRIPTION	
A highly-redundant, self-contained and secure data center originally built to support the IT requirements for a major banking institution.	Features redundant commercial power, cooling and communications.
FACILITY	
LEED Green Building Gold Certification	Leadership in Energy and Environmental Design. A certification that measures building sustainability for being green (around water savings, energy efficiency, materials election, and indoor environmental quality).
This data center facility was originally built to support the IT requirements for a major banking institution.	
SSAE16 SOC 2 Compliant (formerly called SAS70)	We are audited annually against our Controls
PCI CoA very highly redundant, self-contained, and secured data center	Redundant commercial power, cooling, (3) generators, UPSs, PDUs, and xfer switches. Redundant communication carriers/circuits. Over 12k gallons of fuel for the generators. Own water pond and well if commercial water is interrupted.
SECURITY	
Cameras	24 x 7 monitored
Biometric Fingerprint Entry	Complete audit maintained; pre-approved entry
Guest Sign-in at All DC Entrances	iPad mounted quest sign-in application; audited, live notification
SQUARE FEET	
Existing Raised Floor	28,173 Sq. Ft. (Areas A, C, D, E, G)
Raised Floor Presently Used for Data Center	10,308 Sq. Ft. (Areas D, G)
Available Raised Floor for Data Center Expansion	9,470 Sq. Ft. (Areas C, B)
Area – A	10,866 Sq. Ft.
Area – C	5,152 Sq. Ft.
Area – D	6,833 Sq. Ft.
Area – G	3,475 Sq. Ft.
POWER	
Number of DTE Primary Commercial Power Service Lines	Two 13.2 KV, 2500amp
Number of Primary Power Services Automatic Transfer Switches	Two
Substations	Two
Back-up Power Diesel Generators	Three @ 1,750 KVA
Back-up Power Generator Capacity	5,250 KW
Underground Diesel Fuel Capacity (2 tanks)	12,000 gal Total (2,000 + 10,000). On priority list for refueling
Aboveground Diesel Fuel Capacity	600 gal Total (3 @ 200 gal)
UPS Units and Capacity	2 units @ 500 KVA (A/B design) w/own strings of batteries
PDUs / RDUs	4 / 6
Fire Suppression	FM200
COOLING	
Data Center Cooling	6 units @ 20 tons (Area D)
Total Data Center Cooling Capacity	150 tons (Area D)
Building & Data Center Cooling Capacity	1,100 tons
Building w/Data Center Cooling Load	500 tons
Cooling Tower Capacity	1,100 tons
Pond Back-up Cooling Capacity	600 tons
STANDARD RACKS / CABLING	
Rack Enclosure	24"W x 48"D 45RU high
Airflow Management for Each Rack	Provides consistent temperature throughout rack
Environmental Sensors in Each Rack	Temperature and humidity
KVM Services	Allows for remote secured access to racks
Intelligent Power Distribution in Each Rack	Two for A/B power; monitor power usage
Managed with RackWise	Used as our DC systems managers (DCSM)
Use Systimax Structured Connectivity Solution Cabling	20-year product warranty
Use Pre-terminated Cable	For simple and fast installation
In support of EOR/TOR cabling, all Client rows of Racks come with	72 strands multimode fiber; 24 CAT-6A copper cabling
Structured Cabling Foundation	To connect all servers, computers and other network devices together
Cable Management – Overhead and Sidecar	Color coded; labeled; managed thru RackWise
NETWORKING – DARK FIBER	
Dark Fiber between SDC and TDC	We own it; we installed it underground.
96 Strands of Fiber	Known as "single-mode" fiber between SDC and TDC
96 Strands Operate in Pairs	Called full-duplex mode (1 strand to xmit, 1 to receive data)
Each Pair of Fiber	Has the capacity to move up to 40 Gbytes of data per second
All 48 Pairs of Fiber	Can move close to 1.875 terabyte of data per second
The US Library of Congress is the largest library in the world with nearly 145M items on 745 miles of bookshelves. This includes 33M books and other printed materials, 3M recordings, 12.5M photo's, 5.3M maps, 6M pieces of sheet music and 63M manuscripts. It is estimated that this data would fit into 1 petabyte (or 1000 terabytes) of storage	With our fiber capacity, we would be able to move the entire contents of the US Library of Congress from one data center to the other in less than 9 minutes.
NETWORK ISP SERVICES INTO OUR DC'S	
Comcast – TDC	100Mbps
XO – TDC	100Mbps
AT&T – SDC	45Mbps circuit; 100Mbps burstable
CenturyLink – SDC	45Mbps circuit; 100Mbps burstable
FAST FACTS ON WHAT WE HAVE INSTALLED	
Racks Stood up and Committed	TDC – 90 SDC – 130
Physical Servers	TDC – 298 SDC – 247
Virtual Servers	TDC – 733 SDC – 431
Standalone Storage in Terabytes	TDC – 429 SDC – 802
Storage Devices	TDC – 112 SDC – 159
Network Switches	TDC – 101 SDC – 136
Network Devices (Routers, FW's, etc.)	TDC – 100 SDC – 60
UPS KVA Readings	TDC – 221KVA SDC – 211KVA
APPLICATIONS HOSTED	
Number of Outward-facing Websites	209
EMR Hosted	EPIC, Cerner, Meditech, McKesson
Other Hosted Applications	Lawson; Peoplesoft
Application Delivery	Citrix
Interface Engine	Cloverleaf
